# Sample SOP for Canada After Refusal

To,
Visa Officer
(Address)
Country

Dear sir/madam,
Let me send you my warmest greetings for the day.

Subject: Reapplication of Canada Student visa

My name is Chandralekha Shiva Kumar, and I am an Indian citizen. After detailed assessment, I had submitted an application to Conestoga College's Master of Business Analytics Program. My application was accepted, and I now have a letter of offer from the college confirming that. But for the following reason, my subsequent request for a Canadian study visa was turned down.

- Based on the objective of your visit, I am not convinced that you will depart Canada at the conclusion of your stay, as required by IRPR subsection 216(1).

I made an attempt to analyse the grounds for my denial even though my earlier application had stated clearly my claim. I want to start off by assuring you that my entry into Canada is only for temporary and academic needs. In the next sections, the justifications for these claims are clearly described. I shall thus use this document as an opportunity to re-state my case for the Canadian Student Visa. I am hoping that you will give my application a favourable evaluation.
Family background
I am from Vaikom, a tiny village in Kerala. My mother, Raji Shiva, runs a beauty salon in Kottayam, and my father, Shiva Kumar, is a manager at the ICICI Bank Kottayam.

Academics & IELTS Score
The idea of business has always captivated me. I was encouraged to work more during my studies by reading personality or motivational books by well-known authors and business moguls. After reading them in the school libraries, I decided to major in business during higher secondary education at XXX school. I obtained an SSC grade of X and a higher secondary grade of Y. I attended the same school, XXX, for my 10th and 12th grades. My passion in business after finishing high school led me to follow this subject in undergrad. I studied B.com at MG University and came in second in my college in order to gain a deeper understanding of business. The course greatly aided me in discovering my hidden interests, including consumer behaviour, finance, and so on. This masters programme serves as a means of pursuing those interests.

anjitwriter@gmail.com

I took the IELTS exam to demonstrate my ability in the English language in order to be eligible to apply for the programme in Canada. A total band score of 7 was awarded to me (listening- 7, reading-6.5, writing- 7, speaking- 7.5).

Professional Experience

I was employed by XXX company in India as a Research Analyst soon after graduating. I worked on several market-related projects, and the company promoted me as Research Analyst 2 as a result of my efficient performance of duties. In this position, I was responsible for performing accuracy checks on the data, replying to client data requests, researching industry trends to foresee changes, collaborating with teams to conduct root cause analyses, and identifying opportunities for improving quality of data. I also took additional Excel, Python, and SQL training. Every component of my job was extremely pleasurable to me.

As a result, I have arrived at the point where I need to expand my business analytics knowledge and skills. So, to do that, I decided to enrol in a career-enhancing and accredited programme at Conestoga College.

Why this course ?

Due to the connection it makes between my professional and academic experiences, I want to pursue this programme. Working with data was a requirement of my job as a research analyst at XXX firm. But I was unable to advance in my work because of my lack of subject matter competence. Therefore, I made the decision to enrol in this programme so that I could gain the knowledge, exposure, and abilities I would need to comprehend a company's future performance. As a result of the program's learnings, I will be more adept at comprehending data and build analytical thinking abilities which will strengthen my ability to make choices based on data.

Business analytics coursework include a wide range of topics, including project management, data analytics, data collecting, leadership fundamentals, and more. I'll accomplish the following when the course is successfully completed:

- I'll be able to suggest suitable data strategies and technologies to aid in data analysis.
- I'll discover how to use business entrepreneurial methods to uncover new commercial opportunities.
- Improved ability to interpret facts and make decisions.

Why Conestoga College?

One of Canada's top universities, Conestoga College offers top-notch programmes on the most recent developments in business operations. The courses' practical approach will enable students to deal with real-world situations and equip themselves with marketable skills. Additionally, the college boasts cutting-edge, modern facilities that will give students the ideal studying environment. Students are supported and helped by the knowledgeable and well-respected college faculty as they express themselves and learn about themselves via the course. Additionally, the campus has several groups and activities that will help me to strengthen my social and personal skills.

Why Canada?

Due to the overall quality and preparedness of the programmes, Canada is renowned for its analytics industry. Canada also ranks well in terms of security and quality of life. I considered pursuing the programme in India before

thinking about Canada. However, the majority of Indian programmes put greater importance on the subject's theoretical perspective than on its practical application. Lack of skills is the outcome of this. Canada's course is more economical and has a higher standard of life when compared to similar programmes in other nations like the USA, Australia, etc.

Financial details

My parents have financed the business analytics programme in Canada with the aid of a loan. I have already paid xxx CAD for the first year's tuition. My family is secure and financially solid. We have 40 lakes of savings and 2 acres of property. I am including all required documentation with this to back up my statements.

Future Goals and Incentives to return to India

After completing the programme in Canada, I want to establish a prosperous and fruitful job as a business analyst in multinational corporations in India. My professional possibilities will greatly benefit from my Canadian certificate. My family is what really motivates me to go back to India. I am my parents' only child, and I have strong emotional attachments to them. As the only child, it is my duty to take care of them as they get older. I intend to stay with my parents after I return to India in order to give them the emotional and material support they need.

Conclusion

I hope the rejection factors have been adequately covered in the above paragraphs. I want to reassure you once more that my visit to Canada is purely educational and transitory. I have no physical and emotional ties to Canada that would make me remain in the country longer. Therefore I will be going back to my native land.

I anticipate hearing from you favourably.

Sincerely
Chandralekha Shiva Kumar
